

DCC Alimosho Small Group Management App - PRD

Product: DCC Small Group Management App

Team: Alimosho Team

Contributors: Boluwatife Sodipo

Status: **Draft** / Problem Review / Solution Review / Launch Review / Launched

Shipping: TBD

Last Updated: Tuesday, August 25, 2026

Primary Stakeholders: Cell Leaders, Section Leaders, Area/Zonal Coordinators, District & Regional Coordinators, MSU Unit, Church Leadership.

1. Problem Statement

1.1 Seamless Report Submission & Visibility

The Cell Leaders are expected to submit a report after every Sunday cell meeting. In practice, submission is inconsistent, and there is no dashboard that shows Section Leaders, Area/Zonal Coordinators, District Coordinators, or Regional Coordinators which cells reported and which did not. Leaders currently have to chase this information manually (calls, WhatsApp, verbal check-ins), which is slow, unreliable, and not auditable.

1.2 First-Timer / New-Convert Follow-Up Visibility

The MSU unit captures first-timers and new converts and assigns each one to a Cell Leader for follow-up and integration. Cell Leaders are not reliably seeing these assignments, and once assigned, there is no visibility into whether contact was actually made. This creates a real risk that guests and new converts fall through the cracks between their first visit and integration into a cell

1.3 Why This Matters

- Pastoral risk: unreported cells and uncontacted first-timers mean people in need of care go unnoticed.
- Leadership blind spot: coordinators at every level cannot manage what they cannot see.
- No accountability trail: there is no historical record of who submitted, who approved, who was contacted, or when.

- Manual chasing is not scalable across a structure that can span hundreds of cells.

1.4 Hypothesis

- If Cell Leaders can submit Sunday reports through both a web app and WhatsApp, then overall report submission rates will increase.
- If Section, Area, Zonal, District, and Regional leaders have a real-time compliance dashboard instead of manually chasing reports, then the time it takes to identify non-reporting cells will drop from days to minutes, and non-submission will be caught and addressed faster.
- If Cell Leaders receive both an email and an in-app/WhatsApp notification when a first-timer or new convert is assigned to them, then the percentage of assignments that go unnoticed will drop significantly, since leaders won't be solely dependent on checking email
- If MSU and upline coordinators can see real-time contact status for every assigned first-timer/new convert, then follow-up completion rates within 7 days will improve, because uncontacted guests can be flagged and reassigned before they're lost.
- If automated reminders and escalation are introduced for both report submission and first-timer follow-up, then chronic non-compliance (repeated missed reports or uncontacted guests) will decline, since accountability shifts from manual chasing to a systematic, visible process.

2. Goals & Metrics

2.1 Goals

1. Give every leadership level real-time visibility into Sunday cell report submission status, rolled up through the 3-by-3 hierarchy.
2. Give Cell Leaders reliable, timely visibility of first-timers/new converts assigned to them, and give the MSU unit and upline leaders visibility into follow-up/contact status.
3. Reduce the manual effort currently spent chasing reports and follow-up status.

4. Create an auditable historical record of report submissions, approvals, and first-timer contact outcomes.

2.2 Success Metrics

KPI	Target (Post-Launch)
Sunday cell report submission rate (church-wide)	≥ 93% within 48 hours of the Sunday service
Time for a Zonal/District/Regional Coordinator to see who has not submitted	Real-time, on a dashboard
First-timer/new-convert contact rate within 7 days of assignment	≥ 95%
Average time from MSU assignment to Cell Leader acknowledgement	< 48 hours
Reports/records with a complete audit trail (submitted → approved)	100%

3. Daystar Christian Centre, Small Group Structure (The 3-by-3 Model)

Level	Composed Of	Leader / Coordinator Title
Cell	Individual small group	Cell Leader
Section	3 Cells	Section Leader
Area	3 Sections	Area Coordinator
Zone	3 Areas	Zonal Coordinator
District	3 Zones	District Coordinator

Region	3 Districts (minimum)	Regional Coordinator
--------	-----------------------	----------------------

Each level's dashboard must roll up compliance data from the level(s) directly beneath it. E.g, a Section Leader sees the 3 cells under them; an Area Coordinator sees the roll-up of the 3 sections (9 cells) under them; and so on up to the Regional Coordinator, who sees the entire region's compliance at a glance, with the ability to drill down to any individual cell.

4. Stakeholders & User Personas

Persona	Primary Needs From the Platform
Super Admin (Product & Engineering Team)	Set up the org hierarchy in bulk via CSV; manage users, roles, and permissions; oversee the system.
Cell Leader	Submit the Sunday report quickly (web or WhatsApp); see first-timers/new converts assigned to them; log contact outcomes.
Section Leader	Approve/reject cell reports from their 3 cells; see submission status across their section.
Area Coordinator	Approve reports when the section leader is unavailable; view compliance for their area; submit their own reports.
Zonal Coordinator	Approve reports when the section leader is unavailable; view compliance for their zones; submit their own reports.
District Coordinator	View roll-up compliance dashboards across the district; identify chronic non-reporting cells, sections, areas, and zones; export reports for leadership meetings.
Regional Coordinator	View roll-up compliance dashboards across the region; identify chronic non-reporting districts and zones; export reports for leadership meetings.
MSU Team	Register first-timers/new converts; assign them to a Cell Leader; track whether they were contacted and by whom.

Church / Ministry Leadership	High-level, church-wide visibility of reporting compliance and first-timer integration.
------------------------------	---

5. Proposed Process Flow

The following workflows are the proposed workflows (see the attached Daystar Alimosho Small Group Solution process-flow document). These are new workflows to be built, not a description of how things currently work. This proposed flow forms the functional backbone that the rest of this PRD builds on.

5.1 Cell/Section/Area/Zone/District/Region Onboarding

1. The Super Admin signs in to the web app and downloads a CSV template.
2. The template is shared with the Zonal Coordinators (or designated data-entry owner for that arm), who fill in Region, District, Zone, Area, Section, and Cell details.
3. The completed CSV is submitted back to the Super Admin.
4. The Super Admin uploads the CSV, and the system bulk-creates the Region, District, Zone, Area, Section, and Cell records and their hierarchy relationships.

5.2 Leader Signup (Magic Link) - All Levels

The same pattern applies at every level. Cell Leader, Section Leader, Area Coordinator, Zonal Coordinator, District Coordinator, and Regional Coordinator:

1. The leader receives a magic-link email tied to the email address captured during onboarding.
2. The leader opens the link, sets a password, and completes onboarding (profile details).
3. The leader signs in to the platform to perform their role-specific actions.

5.3 Cell Leader Sunday Report Submission - Web App

1. The Cell Leader signs in to the web app.

2. On successful authentication, the Cell Leader clicks “Submit Cell Report.”
3. A report form opens; the Cell Leader completes and submits it.
4. The Section Leader receives an email to approve the report. If the Section Leader is unavailable, the Area/Zonal Coordinator approves it instead.

5.4 Cell Leader Sunday Report Submission - WhatsApp

1. The Cell Leader opens WhatsApp and starts a chat with the Daystar reporting bot.
2. The Cell Leader enters the number/code associated with report submission.
3. The Cell Leader enters the required details and submits; the bot confirms receipt.
4. As with the web flow, the Section Leader receives an email to approve; if unavailable, the Area/Zonal Coordinator approves.

5.5 Area/Zonal Coordinator Report Submission - Web App

1. The Area/Zonal Coordinator signs in and, on successful authentication, clicks “Submit Cell Report.”
2. A report form opens; the Coordinator completes and submits based on the cell selected

5.6 MSU First Timer / New Convert Assignment - Web App

1. The MSU team signs in to the web app.
2. On successful authentication, the MSU team member navigates to “New Entry.”
3. They select whether the person is a “First Timer” or a “New Convert” from a dropdown.
4. They complete the form, assign a Cell Leader based on the location of the first timer/ new convert and cell location, and submit.
5. The assigned Cell Leader is notified by email and can view the details on the web app.
6. The Cell Leader signs in to view the full details and contacts the guest/new convert.

7. If contact is made, the Cell Leader updates the record as “Contacted” with comments. If the Section/Area/Zonal Coordinator has to step in to make contact instead, that should also be logged against the record.

6. Scope

6.1 In Scope

- Compliance dashboards for Sunday cell report submission, rolled up across the full 3-by-3 hierarchy (Cell → Section → Area → Zone → District → Region).
- Real-time “submitted / not submitted / pending approval / approved” status per cell, per Sunday.
- First-timer/new-convert assignment visibility and contact-status tracking, with roll-up dashboards for MSU and upline leaders.
- Automated reminders (emails) to Cell Leaders who have not submitted, and to approvers with pending approvals.
- Escalation rules when reports or follow-ups remain outstanding past a configurable threshold.
- Exportable compliance reports (CSV/PDF) by date range and hierarchy level.
- Building the CSV bulk-onboarding, magic-link signup, and multi-channel (Web + WhatsApp) report submission flows

7. Functional Requirements

7.1 Hierarchy & Onboarding

ID	Requirement
FR-1.1	Super Admin can download a CSV template and bulk-upload Region/District/Zone/Area/Section/Cell records.
FR-1.2	System validates CSV structure and hierarchy integrity (e.g. a Zone must map to exactly one District) before committing the upload, and returns a clear error report for any rows that fail.

FR-1.3	System auto-triggers a magic-link signup email to every leader (Cell, Section, Area, Zonal, District, Regional) captured in the upload.
FR-1.4	Super Admin can view onboarding status per leader (invited/signed up / not yet signed up) and resend a magic link.

7.2 Sunday Report Submission

ID	Requirement
FR-2.1	Cell Leader can submit a Sunday report via the Web App
FR-2.2	Cell Leader can submit a Sunday report via the WhatsApp bot
FR-2.3	Every submitted report is timestamped, linked to the submitting Cell Leader and Cell, and linked to the specific Sunday service date it covers.
FR-2.4	A Cell Leader can view their own submission history and current status (submitted / pending approval / approved / rejected).

7.3 Report Approval Workflow

ID	Requirement
FR-3.1	Section Leader receives an approval request (email + in-app) for each report submitted by a cell in their section.
FR-3.2	If the Section Leader does not act the Area/Zonal Coordinator can also approve
FR-3.3	Approver can approve or reject a report, optionally with a comment; the Cell Leader is notified of the outcome.
FR-3.4	Approval routing for Area/Zonal Coordinator-submitted reports is configurable

7.4 Reporting Compliance Dashboard

ID	Requirement
FR-4.1	Each leader sees a dashboard scoped to their level and everything beneath it, showing, for the current/selected Sunday: cells that submitted, cells that did not, and reports pending approval.
FR-4.2	Dashboard supports drill-down from Region → District → Zone → Area → Section → Cell.
FR-4.3	Dashboard shows a compliance percentage and trend (e.g. last 4/8/12 Sundays) at every hierarchy level.
FR-4.4	Non-submitting cells are visually flagged (e.g. red/amber/green status) and sortable/filterable by “not submitted”, “pending approval”, “chronic non-reporters” (missed 3+ consecutive weeks).
FR-4.5	Leaders can export the compliance view for a given date range as CSV or PDF.

7.5 First Timer / New Convert Assignment

ID	Requirement
FR-5.1	MSU team member registers a First Timer or New Convert and assigns them to a Cell Leader.
FR-5.2	Assigned Cell Leader is notified by email.

7.6 Follow-Up / Contact Tracking

ID	Requirement
FR-6.1	Cell Leader marks an assigned first-timer/new convert as “Contacted” or “Unable to Reach” with free-text comments and a contact date.
FR-6.2	MSU team and the relevant Section/Area/Zonal Coordinator can see, in real time, the contact status of every person assigned within their scope.

FR-6.3	System flags assignments that remain “not contacted” beyond a configurable threshold (default 7 days) as overdue, visible on a dedicated MSU dashboard.
FR-6.4	If a Cell Leader cannot make contact, MSU and/or the Section/Area/Zonal Coordinator can reassign the follow-up, and the reassignment is logged.

7.7 Notifications, Reminders & Escalation

ID	Requirement
FR-7.1	Automated reminder to a Cell Leader who has not submitted a report by a configurable cut-off (e.g. Monday morning after the Sunday in question).
FR-7.2	Automated reminder to an approver with a pending report approval nearing the fallback-routing window.
FR-7.3	Automated reminder to a Cell Leader with an outstanding (not-contacted) first-timer/new-convert assignment.
FR-7.4	Configurable escalation: upline leader is copied/notified when non-submission or non-contact persists beyond a second threshold (e.g. a cell missing 2+ consecutive Sundays, or a first-timer uncontacted after 7 days).

7.8 Roles & Permissions

Role	Key Permissions
Super Admin	Manage hierarchy data, users, roles, system configuration; full read access to all dashboards.
Cell Leader	Submit reports; view own submission history; view and update assigned first-timers/new converts.
Section Leader	Approve/reject cell reports for their section; view section-level compliance dashboard; view section-level follow-up status.

Area / Zonal Coordinator	Fallback approval; submit reports on behalf of cells in their area/zone; view area/zone-level compliance dashboard; reassign follow-ups within scope.
District / Regional Coordinator	View district/region-level compliance dashboards; export reports; no direct approval role by default.
MSU Team	Register and assign first-timers/new converts; view church-wide follow-up/contact dashboard; reassign follow-ups.
Church Leadership	Access to the entire system and dashboard; export reports

8. User Stories & Acceptance Criteria

Epic	Story	Importance
Cell System Hierarchy Setup	As a Super Admin, I want to bulk-upload the Region/District/Zone/Area/Section/Cell structure from a CSV so that I don't have to create hundreds of records manually.	Must Have
	<u>Acceptance Criteria</u> - Given I am a Super Admin, when I click "Download CSV Template," I should get a template with columns for Region, District, Zone, Area, Section, and Cell details. - Zone Name - Zone Code - Zonal Coordinator Name - Zonal Coordinator Email Address - Zonal Coordinator Phone Number - Area Name - Area Code - Area Coordinator Name - Area Coordinator Email Address	

	• Area Coordinator Phone Number • Section Name • Section Code • Section Leader Name • Section Leader Email Address • Section Leader Phone Number • Cell Name • Cell Type (Adult, Teens, Preteens, Children, Adult/Children, Online/Virtual) • Cell Code • Cell ID • Cell Leader Name • Cell Leader Email Address • Cell Leader Phone Number • Given I am a Super Admin, when I upload a completed CSV, the system should validate that • 3 Cells = 1 Section • 3 Sections = 1 Area • 3 Areas = 1 Zone • 3 Zones = 1 District • 3 Districts = 1 Region • Given I am a Super Admin, when the CSV has invalid or missing hierarchy links, I should see a row-level error report and no records should be created until the errors are fixed. • Given I am a Super Admin, when the CSV upload is successful, the system should create the Region, District, Zone, Area, Section, and Cell records and automatically trigger a magic-link signup email to every captured leader.	
Leader Onboarding (Magic Link)	As a newly onboarded leader (Cell, Section, Area, Zonal, District, or Regional), I want to activate my account via a magic link so that I can access the platform securely.	Must Have

	<u>Acceptance Criteria</u> • Given I am a leader captured during hierarchy setup, when my record is created, I should receive a magic-link email at my registered email address. • Given I am a leader, when I click the magic link, I should be taken to a screen to set my password and complete my profile. • Given I am a leader, when I complete onboarding, I should be able to sign in and see only the dashboard and actions relevant to my role and hierarchy scope. • Given I am a Super Admin, when a leader has not signed up after a configurable period, I should be able to see their onboarding status and resend the magic link.	
Sunday Report Submission — Web App	As a Cell Leader, I want to submit my Sunday cell report on the web app so that my cell's activity is recorded and visible to my leadership.	Must Have
	<u>Acceptance Criteria</u> • Given I am a Cell Leader, when I sign in successfully, I should see a “Submit Cell Report” action on my dashboard. • Given I am a Cell Leader, when I click “Submit Report,” a report form should open for the current Sunday service date. • Members Present (type box) • Membership ○ Guest/Decision Cards ■ Guests Card Received ■ Decisions Card Received ■ Guests - Total Visitation ■ Decisions - Total Visitation ○ Visitation Among Members ■ Physical Contact	

	■ Phone ■ Text Message ■ Email ■ No Meeting Held ● Maturity ○ Finance ■ 100% Paid In ○ Holy Ghost ■ Baptism in the Holy Ghost ● Ministry ○ Communion Service ○ Community Project ○ Less Privileged Visitation ○ Cell Leader Visitation ○ Cell Members Visitation ● Mission ○ New Cells ○ Converts ○ Guests ○ Programme Outreach ● General ○ Comments (Long text box) ● Given I am a Cell Leader, when I complete and submit the form, the report should be time-stamped, linked to my cell, and set to “Pending Approval” status. ● Given I am a Cell Leader, when I view my submission history, I should see the status of every report I have submitted (Pending Approval / Approved / Rejected).	
Sunday Report Submission — WhatsApp	As a Cell Leader, I want to submit my Sunday cell report through the WhatsApp bot so that I can report even without reliable access to the web app.	Should Have

	<u>Acceptance Criteria</u> • Given I am a Cell Leader, when I open a chat with the Daystar reporting bot, I should be able to enter the number/code for report submission. • Given I am a Cell Leader, when I enter my report details in the chat, the bot should confirm successful submission. • Given I am a Cell Leader, when my report is submitted via WhatsApp, it should appear on the same dashboard as web-submitted reports, with the channel recorded as “WhatsApp.”	
Report Approval Workflow	As a Section Leader, I want to approve or reject the Sunday reports submitted by the cells in my section	Must Have
	<u>Acceptance Criteria</u> • Given I am a Section Leader, when a cell in my section submits a report, I should receive an email and in-app notification to review and approve it. • Given I am a Section Leader, when I open a pending report, I should be able to approve or reject it, optionally with a comment. • Given I am a Cell Leader, when my report is approved or rejected, I should be notified of the outcome.	
Report Approval Visibility & Overdue Tracking	As a Section Leader, Area or Zonal Coordinator, I want to see every report awaiting my approval and how long it has been waiting, so that I can act before it stalls compliance.	Must Have

	<u>Acceptance Criteria</u> • Given I am an approver, when I open my approvals queue, I should see every report awaiting my approval along with the date/time it was submitted. • Given I am an approver, when a report has been pending for longer than a configurable threshold, it should be visually flagged as “overdue” in my queue. • Given I am an approver, when I approve or reject a report, it should immediately leave my pending queue and update the submitting Cell Leader's status.	
Reporting Compliance Dashboard	As a leader at any level (Section, Area, Zonal, District, or Regional), I want a real-time dashboard of report submission status for everything under my scope so that I know exactly who has and has not submitted.	Must Have
	<u>Acceptance Criteria</u> • Given I am a leader, when I open my compliance dashboard, I should see, for the selected Sunday, which cells under my scope have submitted, which have not, and which are pending approval. • Given I am a leader, when I click on a lower hierarchy level (e.g. a District from a Region view), I should be able to drill down to that level's own breakdown, down to individual cells. • Given I am a leader, when I view the dashboard, I should see a compliance percentage and a trend over the last 4/8/12 Sundays. • Given a cell has missed 3 or more consecutive Sundays, it should be visually flagged as a “repetitive non-reporter” on my dashboard.	

Historical Exportable Reporting	&	As a District or Regional Coordinator, I want to export historical report-compliance and first-timer follow-up data for a chosen date range, so that I can review trends and report to church leadership.	Should Have
		<u>Acceptance Criteria</u> • Given I am a leader, when I select a date range on my compliance or follow-up dashboard, I should be able to export the corresponding data as CSV or PDF. • Given I am a leader, when I export a report, it should include cell/section/area-level breakdowns, not just a single church-wide total. • Given I am a leader, when I need historical data older than the default dashboard view window, I should be able to query it by specifying a custom date range. • Given I am church leadership, when I request a summary for a leadership meeting, a Regional Coordinator should be able to generate a single exportable report covering the entire region.	
First-Timer New-Convert Assignment	/	As an MSU team member, I want to register a first-timer or new convert and assign them to a Cell Leader so that they are followed up and integrated into a cell.	Must Have

	<u>Acceptance Criteria</u> • Given I am an MSU team member, when I navigate to “New Entry,” I should be able to select whether the person is a “First Timer” or a “New Convert.” • Given I am an MSU team member, when I complete the entry form, I should be able to assign the person to a specific Cell Leader and submit the record. • Given I am a Cell Leader, when I am assigned a first-timer or new convert, I should receive an email notification and an in-app notification/badge, so I don't rely on email alone. • Given I am a Cell Leader, when I sign in, I should be able to view the full details of everyone assigned to me.	
Follow-Up / Contact Tracking	As a Cell Leader, I want to record whether I successfully contacted an assigned first-timer or new convert so that MSU and my upline leaders know the outcome.	Must Have
	<u>Acceptance Criteria</u> • Given I am a Cell Leader, when I contact an assigned person, I should be able to mark the record as “Contacted” and add comments. • Given I am a Cell Leader, when I am unable to reach an assigned person, I should be able to mark the record as “Unable to Reach” with comments. • Given I am an MSU team member or an upline coordinator, when I view my follow-up dashboard, I should see the real-time contact status of every person assigned within my scope. • Given an assignment remains “Not Contacted” for more than 7 days (configurable), it should be flagged as overdue on the MSU or Zonal Coordinator dashboard.	

	Given I am an MSU team member or coordinator, when a Cell Leader cannot make contact, I should be able to reassign the follow-up to another Cell Leader, and the reassignment should be logged.	
Notifications, Reminders & Escalation	As a Cell Leader, I want to be reminded if I haven't submitted my report or contacted an assigned first-timer so that I don't miss my responsibilities.	Should Have

9. Non-Functional Requirements

Category	Requirement
Availability	The platform must be available every Sunday and the following 48 hours with minimal downtime, given this is the peak usage window for report submission.
Performance	Compliance dashboards load in under 3 seconds for a Region-level view (hundreds of cells).
Auditability	Every report submission, approval/rejection, first-timer assignment, and contact update is timestamped and attributed to a user, and retained in an audit log.
Notifications	Email and WhatsApp notifications delivered within 3 minutes of the triggering event.
Access Control	Role-based access strictly scoped to a leader's position in the hierarchy; a leader cannot view or act on data outside their scope.
Data Privacy	First-timer/new-convert personal details (contact info, comments) are only visible to their assigned Cell Leader, relevant upline coordinators, and MSU.
Usability	Cell Leaders (a broad, non-technical user base) must be able to submit a report in under 2 minutes on both Web and WhatsApp.

Localization/Access	Web App must be usable on low-bandwidth mobile connections; WhatsApp channel exists specifically to serve leaders with limited data/device access.
---------------------	--

10. High-Level Data Model

Core entities the platform must support (attributes indicative, not exhaustive):

- Region, District, Zone, Area, Section, Cell. Hierarchical entities, each with a parent reference matching the 3-by-3 structure.
- User/Leader: linked to exactly one hierarchy node and a role (Cell Leader, Section Leader, Area Coordinator, Zonal Coordinator, District Coordinator, Regional Coordinator, MSU, Super Admin).
- SundayReport: cell, service date, submitted-by, submission channel (Web/WhatsApp), submitted-at, status (submitted / pending approval / approved/rejected), approved-by, approved-at.
- FirstTimer/NewConvert: type (first timer / new convert), captured-by (MSU), assigned Cell Leader, assignment date, contact status (not contacted/contacted / unable to reach), contact comments, contact date, reassignment history.
- Notification Log: recipient, type (reminder/escalation/assignment), channel, sent-at, related entity (report or first-timer record).

11. Appendix

Term	Definition
MSU	Member Services Unit: the team responsible for capturing and assigning first-timers and new converts.
Cell	The smallest small-group unit, led by a Cell Leader.
First Timer	A guest attending a Daystar Christian Centre service for the first time

New Convert	A person who has recently made a decision for Christ and is being integrated into a cell.
Magic Link	A one-time email link used for secure, passwordless-style account activation.
Roll-up	Aggregated data from lower hierarchy levels is summarised at a higher level (e.g. Section roll-up from its 3 Cells).
Repetitive Non-Reporter	A cell that has missed report submission for 3 or more consecutive Sundays.

Key Milestones

Target Date	Milestone	Description
